HIGHWAYS

With an **average commute time of 22 minutes**, Tucson beats the national average. People spend less time time traveling, and more time where they want to be. Businesses benefit from close proximity to major markets and west coast ports.

RAIL & INTERMODAL SHIPPING

The Port of Tucson, **the region's intermodal facility, is located directly on the Union Pacific main line** and provides international ocean container rail service to and from seaports in California and Mexico.

This allows companies to **avoid delays at Port of Los Angeles and Port of Long Beach** and take advantage of **lower freight costs** by avoiding over the road transportation.
